My wife and I make our living on the road. We own a truck and are leased to FedEx Custom Critical. XM radio has greatly improved our life out here on our nations highways. Not only does it give us countless hours of listening pleasure, but it also provides us with information that helps us to safely do our job. Local, commercial sponsored radio just does not measure up to XM's quality of operation. Their signal is just not very clear and they have too many commercial advertisements. By the time they finished giving us all the information we didn't care anything about and get around to the information we were waiting for we are usually out of the listening area and searching for another station where the process starts all over again. Constantly adjusting the radio searching for a station is just plain unsafe. As Americans, voters, tax payers, and safety minded truckdrivers hauling the nations goods across this great country we urge you to let XM radio provide us with the service that we pay for.
